

GATHER 4 GAZA FESTIVAL – SOLIDARITY TO THE PALESTINIAN RESISTANCE!

These scums finally came, to annihilate us with bombs, to announce to us that we simply did not exist... they threw children, elderly and just married people, dead or half-dead, deep into a mass grave, and all this happened to tell to the world of the living dead that we did not exist, that we had never existed and that thus, therefore fairly.. they exterminated us.

Poem Jenin, Etel Adnan

But all these Zionist fascists and murderers can't understand that the resisting people cannot be annihilated, their memory lives on in our imagination, their breath becomes the wind of change and their presence casts a heavy shadow over them, so that they can foresee only but their own self-destruction. The more they kill civilians, destroy homes and bomb hospitals, the weaker they become, drowning into the lake of the innocent blood they cause.

Palestinian resistance, in arms or not, inside or outside the apartheid state of Israel, shows us the way of proletarian pride, popular dignity and persistence in the struggle against injustice, no matter how difficult it is. It shines as a great example for all of us to resist against the authority, no matter how powerful it may seem. Two totally opposite worlds come in conflict, the one of the inhumanity and the cold death policy aiming at ethnic cleansing and the other of the hope that holds the flame of solidarity and rebellion in order to create a world worth living.

The Greek state, on the other hand, functions as the collective representative of the national bosses interests, as well as following the instructions from its international "protectors". It provides support to the apartheid regime of the state of Israel, taking part into the war against Palestinians. It also takes a clear position on class war, with refuge pushbacks, murders and refusal of their reception in EU countries, building concentration camps, using fascistic paramilitary groups at the borders (and not only), raising the prices in electricity and rents, privatizing hospitals and education institutions. Ironically, it presents this attack on the multinational working class and the poor people as the so-called "correct side of history"!

We, as Antifa League Athens assembly, will always be in the streets by the side of our oppressed class brothers. We will always be against capitalism, imperialism and nationalism. And we will always be by the side of the self-organized fighting resistance against the political and economic system of power and all kinds of fascists, always in favor of the struggle for a self-directed society of cooperation, solidarity and freedom.

Class war against the state and the capital!

**From Athens to Gaza and from Europe till Middle East,
revolution is not only necessary but also should be real!**

**The Palestinian Resistance is fair, popular,
revolutionary and it will win!**
